3. An examiner's amendment to the record appears below. Should the changes and/or

additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR

1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the

payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with

Anthony England (Reg. No. 35,129) on May 26, 2006.

4. The application has been amended to remedy an issue of non-statutory subject matter

## Allowable Subject Matter

5. Claims 2, 7-9, 12, 17-19 are allowed.

6. The following is an examiner's statement of reasons for allowance.

The prior art of record does not teach or suggest "performing a computation by the compiler for determining n + 1 values for the variable in the loop termination condition, such that a first one of the values would, upon execution at run time, terminate the loop code segment in 0 iterations, a second one of the values would, upon execution at run time, terminate the loop code segment in 1 iteration, and an (n + 1)th one of the values would, upon execution at run time, terminate the loop code segment in n iterations" in the manner and combination recited in each of independent claims 2 and 12.

- U.S. Patent No. 5,361,354 to Greyzck, now made of record, discloses optimizing loop constructs in code (see, for example, the abstract), including the step of determining values for the variables in a loop termination condition such that the values terminate the loop code segment in different numbers of iterations (see, for example, column 3, line 30 to column 4, line 59), but does not disclose the elements noted above as recited in the claims.
- 7. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
